

### **Cost Estimates Explained**

SimonMed Imaging provides an estimated cost that will be due when you receive your physician ordered exam. Like most medical providers, we gain information from your insurance company regarding your plan. Based on the exam and the amount your insurance covers, an estimated cost is provided.

- **SimonMed checks your insurance benefits, prior to services being rendered, to provide an estimated cost at time of service.**

Based on the exam ordered by your physician, your insurance company reports the amount of coverage they will provide using;

- Remaining deductible
  - Patient coinsurance
  - Copayments (if applicable)
  - Out-Of-Pocket Maximum remaining
- **This information comes directly from your insurance company.**  
The insurance company reflects the current balances remaining on the above items. This does not include any pending claims that have not been processed. Please note it takes 6-8 weeks for most claims to be processed by your insurance and to update deductible, coinsurance, and Out-of-pocket maximum balances.  
**This is why time of service costs are only an estimate and are subject to change once your insurance processes your claim.**

**If you have additional questions about your estimated amount due at time of service, you can email us at [EstimatedCost@simonmed.com](mailto:EstimatedCost@simonmed.com).**
